### Nautilus Standard

## Single-Channel Temperature Data Logger (Max 85°C)

The Nautilus Standard is a durable, robust data logger that can monitor temperature in a variety of applications but is particularly well suited for the food and beverage, biomedical, pharmaceutical, and industries with hostile or "wet" environments (i.e. wastewater treatment plant). Housed in a stainless steel or aluminum casing, it can withstand virtually any environment and with an operating pressure range of up to 2,000 PSI, it is ideal for monitoring temperature in any type of water including oceans, ponds, rivers, streams and wastewater.

### **APPLICATIONS**

Record temperature of food products and other perishable goods; useful in the storage and transportation of food, the medical and pharmaceutical industries, agricultural, ocean and pond studies, environmental studies, process monitoring, and hostile environment monitoring.
